EDUCATION

Korea Advanced Institute of Science and Technology (KAIST)
Undergraduate, Computer Science Expected Summer 2030

EXPERIENCE

AI Engineer Intern Summer 2026
Misheel Orshikh LLC

- Built water-usage forecasting and anomaly detection systems for MonusAI using Python and pandas to analyze consumption patterns.
- Integrated Gemini API chat functionality and developed an admin dashboard for the MonusAI project.

Frontend Engineer Intern Summer 2025
Erxes Inc

- Integrated APU's forms and questionnaires with the Erxes backend plugin system to connect customer submissions to CRM workflows.
- Developed the Ug-Center gym website with TypeScript, QPay payment integration, and time-slot management.
- Fixed bugs in the Chingeltei district portal in collaboration with senior developers using Git.

Software Engineer Intern Summer 2024
Misheel Orshikh LLC

- Contributed to a JavaScript IoT dashboard that visualized electric-meter data for monitoring electricity usage.

PROJECTS

Robotics Tournament Registration 2026
React, TypeScript, Express, MongoDB

- Led development of the registration platform adopted by the Mongolian Robot Association, supporting over 300 teams that registered and participated in tournaments.
- Built receipt-upload and admin-verification workflows to track MNT 10 million in participation fees paid by bank transfer.
- Implemented team registration, category eligibility checks, and organizer reporting with contributions from junior developers.

Voxel Engine 2026
Python, ModernGL, GLSL, NumPy, Numba

- Built a Python voxel engine with procedural terrain, interactive block editing, and ambient occlusion shading.
- Implemented binary greedy meshing, frustum culling, and Numba-compiled mesh generation; packed vertex attributes into 32-bit integers.

Mongol Aspiration School Website 2025
TypeScript, React, Cloudinary

- Led development of Mongol Aspiration International School's official website, building its core pages and navigation.
- Built an admin panel and content-management features with Cloudinary media storage and cPanel hosting.

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, GLSL, HTML/CSS
Web & Databases: React, Next.js, Node.js, Express, MongoDB, Tailwind CSS
Data & Graphics: pandas, NumPy, Numba, ModernGL/OpenGL, Pygame
Tools: Git, GitHub, Vite, Vercel, Cloudinary, cPanel
